

## Ways to avoid scam online

1. When they say, the offer is limited.
2. When they say, claim your spot, we only have room for two more.
3. When they have the advertisement out only for today.
4. When they offer a huge discount, the regular price is \$999 but you do not pay \$499, even not \$199 but only \$99.
5. When you can't see what you are paying for, no transparency.
6. When you have to download stuff, to get into the program.
7. When there isn't any information available about the company.
8. When they promise you an income of \$10,000 dollar within a month.
9. If you have to pay money to be allowed to join.
10. If guarantees are given on the level of earnings.
11. If it's too good to be true, it usually IS to good to be true!
12. Note the writing style. Is it in understandable correct English.
13. If there is actually very little information.
14. If there is an overload of information, you do not understand at all anymore.
15. If the site is loud, with lots of flashing and call to action buttons.

Have fun online but always be cautious!
